SAVOIR-FAIRE

For more than 50 years, Lum'art has been offering high-end lighting solutions combining elegance, functionality, authenticity, and design. Founded in 1961, Lum'art now offers over 450 types of interior and exterior lighting options— all of which are available in 15 different finishes specially developed in our Perche design studios. As a company dedicated to art and craftsmanship, Lum'art's entire production process, from the first sketch to the final step on the manufacturing floor, is carried out in France by qualified teams that carefully work with high-quality materials such as copper, brass, and solid zinc to create exceptional lighting solutions. Lum'art offers elegant, sophisticated solutions for showcasing the most beautiful home interiors and exteriors.

HAUTE COUTURE

Every Lum'art piece is manufactured to order and hand-assembled in France, thereby guaranteeing flawless quality and optimal suitability for each project. The company's rapid response time and expert advice allow it to operate in unique situations and fill even the most unusual orders. An attentive and highly experienced team is available to transform the ideas of artists, architects, designers, and individuals into reality using a wide variety of designs, finishes, sizes, and installation methods. Such a personalised approach to each project makes it possible to offer essentially customised original solutions that satisfy the most specific needs and the most exacting clients.

Each item is available in a choice of about
15 sheen finishes, designed by us.

The lamp designs are available in different sizes and mounting systems, depending on the planned location.

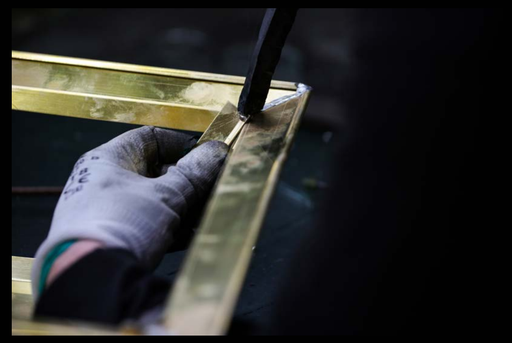

DESIGN

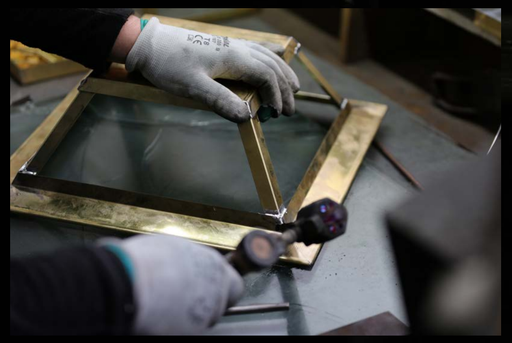

Lum'art designs and creates new models, ranging from the most contemporary to the most traditional, which are presented twice yearly at the "Maison et Objet" international trade fair. The brand's search for new features, forms and finishes results in unique collections that reflect the latest trends. Certain architects also call on Lum'art's creativity to develop lighting solutions that fulfil the exact requirements of their projects. The combination of some of the brand's classic features and new modern forms, the adaptation of an existing design, or a simple sketch can give rise to a one-of-a-kind product.

ART & PATRIMOINE

Each zinc, copper, or solid brass piece is cut, shaped, welded, and finished in accordance with standard practice by artisans who have perfected their craft after years of dedicated work. Lum'art products are known to be highly reliable due to their high-quality craftsmanship, the artisans' mastery of techniques that are specific to the brand, and the careful attention given at every step in the manufacturing process. Lum'art has successfully combined tradition and innovation, expertise and creative energy, hard work and passion, tradition and the future, local focus and international reach. The Entreprise du Patrimoine Vivant (EPV) and the Ateliers d'Art de France Foundation labels testify to the brand's outstanding quality of French manufacturing.

“Entreprise du Patrimoine Vivant” and “Atelier d’Art de France” labels, were awarded to Lum’art to distinguish its know-how and more than 50 years of excellence.
